The AutoCAD Activation Code plugin is a plugin in AutoCAD for interacting with the Autodesk Exchange Apps. Macros Macros are non-GUI applications, which are run in AutoCAD from a dialog box similar to a command prompt. Macros may be written in AutoLISP, Visual LISP or VBA and execute natively, or may be written in any .NET language and then compiled to AutoLISP. Macros may also be created in Autodesk Design Review, an application which provides an XML data format for macro based applications and that offers integration with the Exchange store. Metadata AutoCAD's R12 file format includes a metadata section. Metadata can be used to provide information about a drawing, such as title and comments, as well as about features (for example, that they are editable) or about tools (for example, that they are only available to users with role "Author"). Metadata is written by the tools themselves, but may also be written by the user or automated by the Autodesk Exchange tools or native metadata plugins, such as the Metadata Manager. ObjectARX AutoCAD introduced ObjectARX as the base technology for its AutoCAD add-ons and later offered a toolset to develop and extend it, which was referred to as the ObjectARX Editor. It was also used to develop the .NET Core and Class libraries for AutoCAD. Version 1.0 was shipped in 1998, which was included in AutoCAD 2000. It was the predecessor of the ObjectARX MUI. ObjectARX is a class library which contains a set of generic and inheritance-based classes for user interface handling, generic and inheritance-based classes for data access and data binding, and some types for event handling. Its Event system can be used to receive and dispatch events based on method calls in an event handler. AutoCAD's ability to update itself via the ObjectARX API means that its applications are able to respond to changes in the drawing. The ObjectARX Editor is a program that is used to create visualizations and visual design experiences and that includes: Customizable UI layouts to present and collect information from users Visual design workflow tools to layout drawings and create associated objects Animation or tool behavior-driven development environment ObjectARX contains the AutoLISP and Visual LISP language classes to describe views of a drawing, customize the a1d647c40b
