Q: How can I remove the border of html element using CSS? I am using Visual Studio 2017 with C# and HTML and when I use a CSS stylesheet for my Web Application, it automatically put a white border on my HTML

---

element. I want to remove this white border. How can I do this? I'm Using Visual Studio 2017,.Net Framework 4.7.1, 64-bit OS. A: To remove the border, You need to apply the following class as the container tag's css property border:none; This will remove the border of the element, if there is no border the element will have no border lines. .parent { border:none; width:1000px; } A: Thanks to @Paul, this problem occurred due to setting display as inline-block. If you want to remove border from elements use the

---

following code `.parent { display: inline-block; }` instead of `.parent { display: inline; }` A: `.whiteBorder { border: none!important; margin: 0!important; }` And, you need to apply that css class to the element. The effect of HLA-DR15 allele frequency on the severity of Sweet's syndrome. The role of human leukocyte antigen (HLA) class II alleles in the development of Sweet's syndrome (SS) was studied in a Turkish population. The HLA-DR15 allele frequency of 16 patients with SS was compared with that of 48 healthy

---

controls. The frequency of the HLA-DR15 allele in patients with SS was found to be significantly higher than that of controls (52.5% vs. 18.5%)
